

PERMITS

A permit is required for an accessory building with **any** dimension greater than 12'-0" (12 feet).

The first step in building an accessory building should be to obtain the proper **Zoning** and **Building** permits.

FOUNDATION

Accessory buildings may be constructed without masonry or concrete foundation provided all the following conditions are met. As follows;

1. The accessory building shall not exceed 400 square feet.
2. The accessory building shall not exceed one (1) story in height.
3. The accessory building is supported on wood foundation of a minimum 2"x6" or 3"x4" mud sill of approved wood in accordance with section 323 of the NC Residential Code.
4. The accessory building shall be anchored to resist overturning and sliding by installing a minimum of one (1) ground anchor at each corner of the accessory building. The total resisting force for all anchors shall be equal to 20 psf times the plan area of the accessory building.

NOTE: See *Anchoring Detail*.

The building inspector is then called out to look at the following items:

1. The inspector can inspect the building after all construction has been completed provided the interior of the accessory building has not been finished. The studs and rafters must be visible for inspection.
